Introduction to Radiography and PACS Chapter I

Introduction to Radiography and PACS
This PACS Fundamentals course is offered FREE as an introduction to OTechU's online courses. It is actually a compilation of the first lessons of four separate courses on the subjects of Medical Imaging, PACS, Healthcare Standards and PACS Workflow.

OTechU
Unique Blend of Caring and Technological Expertise
Radiography is a caring profession that also calls for considerable technological expertise. Radiography has come a long way since its birth in 1895, when x-rays were discovered. Today it involves working with state-of-the-art technology across many imaging modalities, with patient diagnosis, treatment and care at its core.

Radiography's origins and fluoroscopy's origins can both be traced to 8 November 1895, when German physics professor Wilhelm Röntgen discovered the X-ray and noted that, while it could pass through human tissue, it could not pass through bone or metal. Röntgen referred to the radiation as "X", to indicate that it was an unknown type of radiation. He received the first Nobel Prize in Physics ...

Radiographer - Wikipedia
Radiology is the medical specialty that uses medical imaging to diagnose and treat diseases within the human body. A variety of imaging techniques such as X-ray radiography, ultrasound, computed tomography (CT), nuclear medicine including positron emission tomography (PET), and magnetic resonance imaging (MRI) are used to diagnose or treat diseases. ...
